

50⁺ Mil.

The amount of people suffering from
Chronic Inflammatory Conditions
in the USA.

Are you one of them?

Don't worry though.
We have a way to fix it!

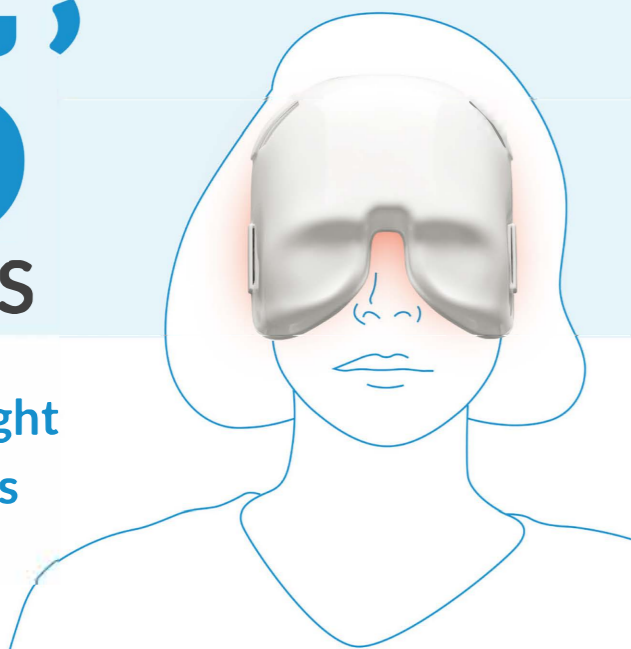

Book an appointment
TODAY

An all-new, totally painless way
to handle inflammation

15'

MINUTES

Low-level Light
Simply works

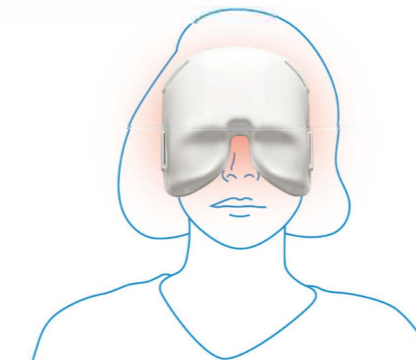

Book an appointment for a **TREATMENT** **NOW.**

Low-Level Light Therapy:
Manages Inflammation in Under

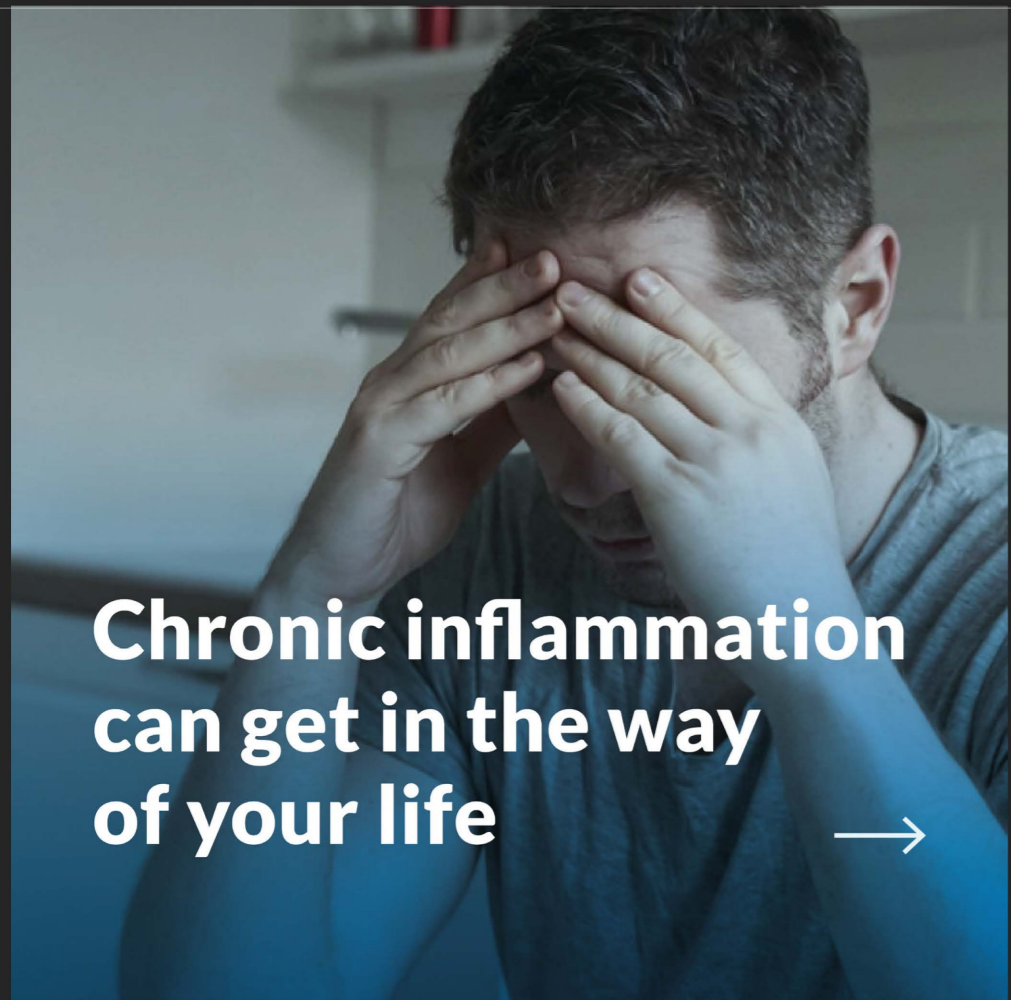

15'

MINUTES

It's Science-backed and totally
painless: it just works. →

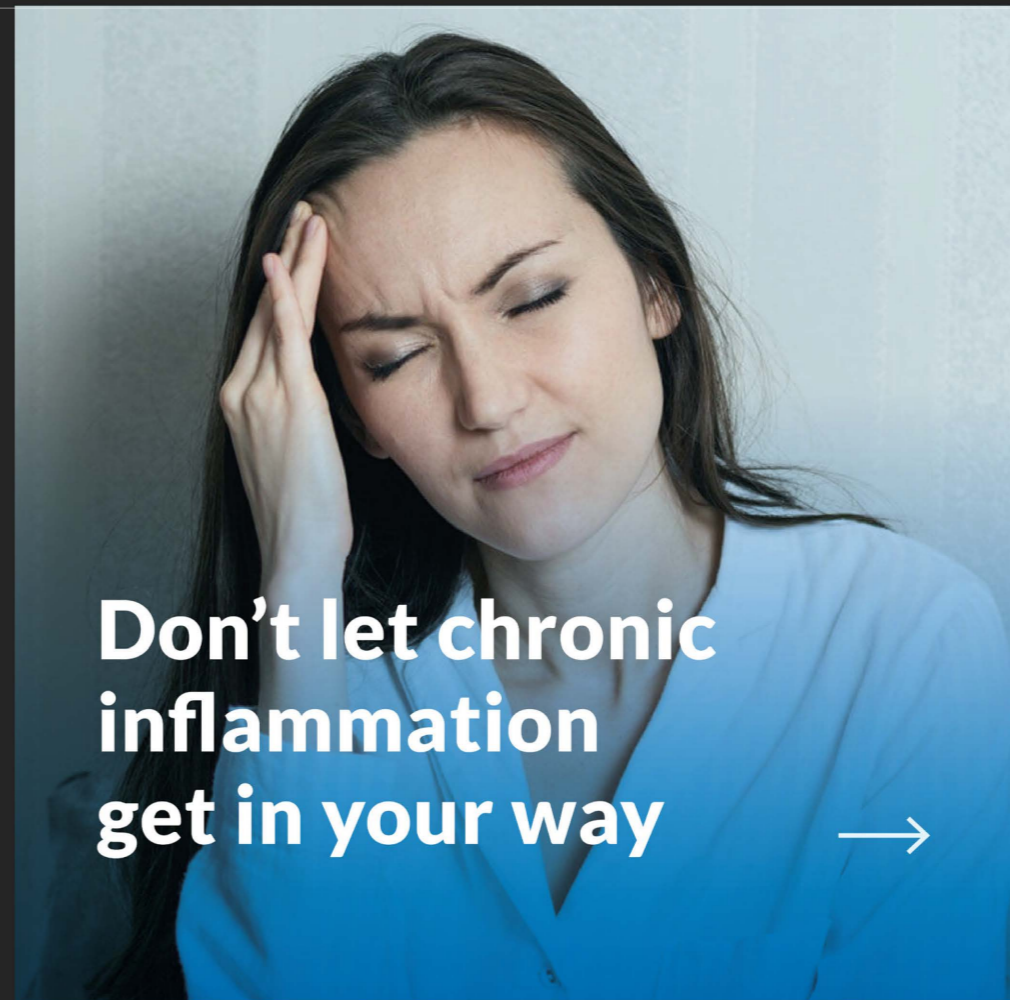

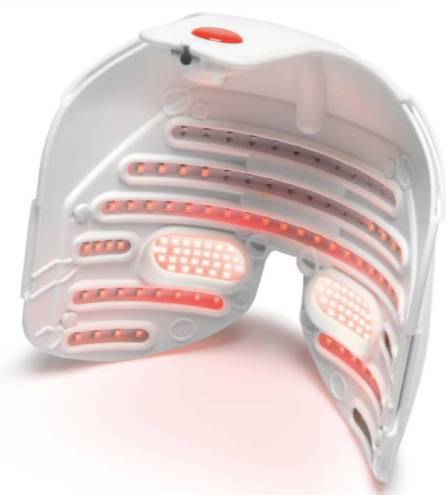

Book an appointment for a **TREATMENT** **NOW.**

Chronic inflammation can get in the way of your life →

Low-Level Light Therapy (LLLT) can help you with that—**with no pain.**

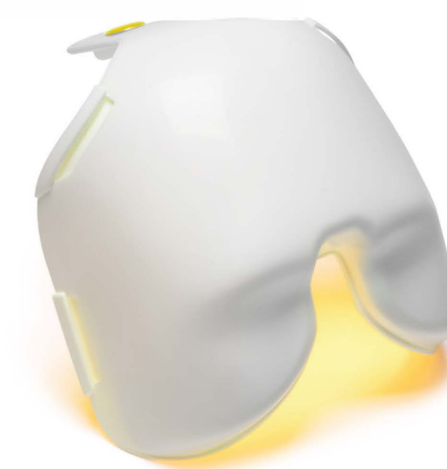

Come try it out!

Don't let chronic inflammation get in your way →

Low-level Light Therapy can help you with that.

Call today or book an appointment.

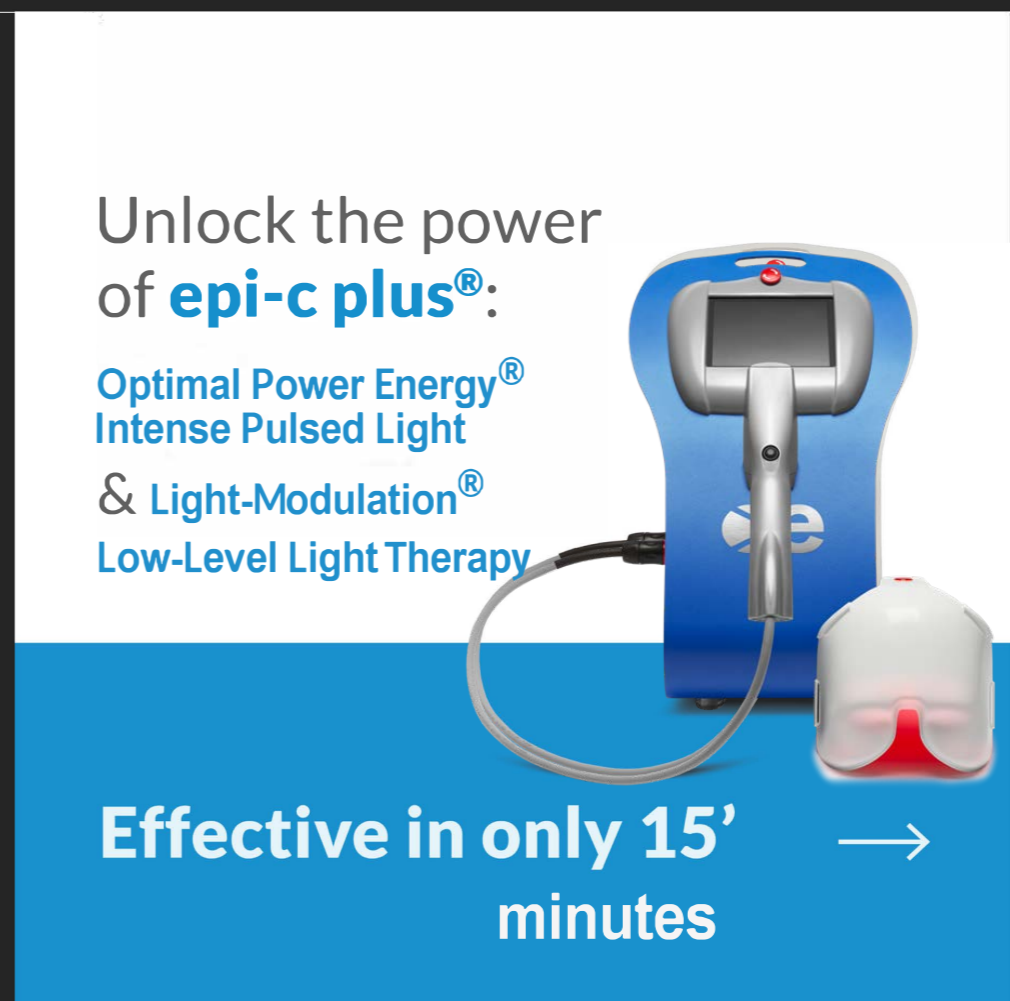

Chronic inflammation? We have the solution →

Discover the power of **epi-c plus®**:
Optimal Power Energy® Intense Pulsed Light & Light-Modulation®
Low-Level Light Therapy

Book an appointment for a **TREATMENT NOW.**

Unlock the power of **epi-c plus®**:

Optimal Power Energy® Intense Pulsed Light & Light-Modulation®
Low-Level Light Therapy

Effective in only 15' minutes →

- FAST
- IMMEDIATE RELIEF
- PAINLESS
- SAFE AND SIMPLE

It just works.

Chronic Inflammation?

Discover the transformative power of **epi-c plus®**, harnessing the innovative **Optimal Power Energy® Intense Pulsed Light** and **Light-Modulation® Low-Level Light Therapy** technologies for effective, non-invasive treatment.

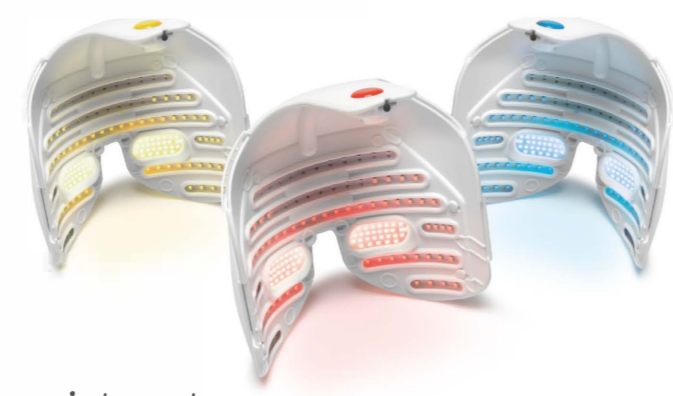

Book an appointment!

Struggling with Chronic Inflammation? Want to Soothe the pain? →

There is a **painless, effective** way to manage it.

Book an appointment **NOW.**

epi-c plus®

The all-in-one powerhouse for light therapy.

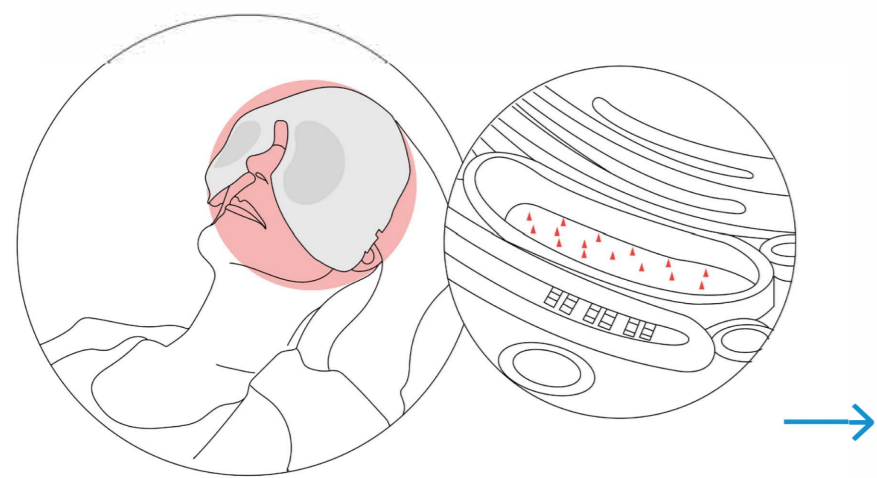

epi-c plus® – featuring unique **Light Modulation® LLLT** and **Optimal Power Energy® IPL** technologies, for optimal, non-invasive treatment of most inflammatory conditions.

- Light Modulation Low-Level Light Therapy
- Optimal Power Energy Intense Pulse Light

LM[®] LLLT

Low-Level Light Therapy.

Science told us.
It just works.

Light Modulation[®] Low-level Light Therapy—a technology like no other.

- it's fast—a treatment lasts 15 minutes
- it's painless
- it grants immediate relief
- it's easy and safe

Optimal Power Energy[®] IPL

Intense Pulsed Light

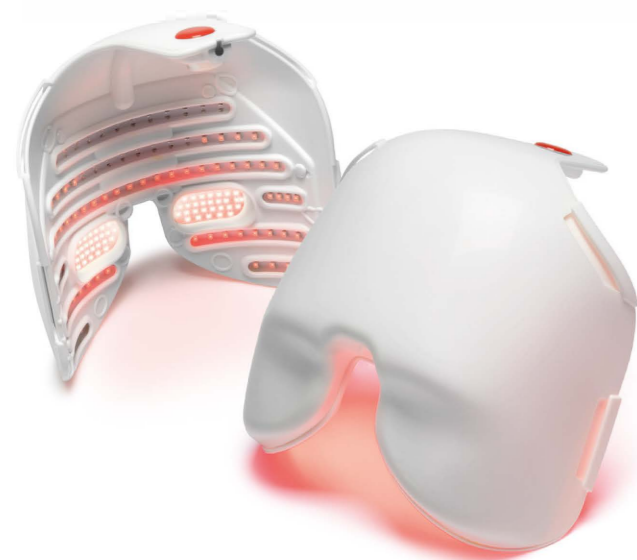

OPE[®] IPL is the only pulsed light in the world allowing for usage without any protective gel.

- improves blood circulation
- disperses vessels
- anti-inflammatory cytokine release

Red LM[®] LLLT

Low-Level Light Therapy

Used for Inflammation Reduction and ATP Production Stimulus

- Increased **ATP Production**
- **Boosted cell metabolism**
- **Inflammation reduction** by regulating antioxidants
- Activated transcription factors and signaling pathways
- **15-minute painless treatment**

Contact us to learn more!

Blue LM[®] LLLT

Low-Level Light Therapy

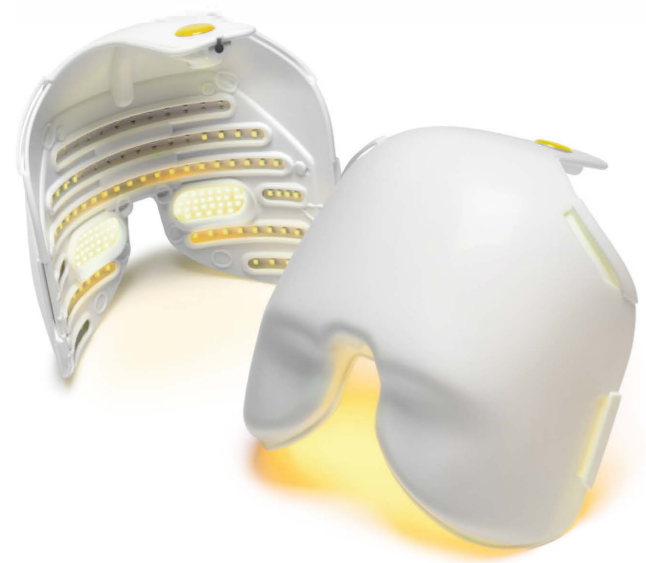

Used for Bacteria elimination and Microbiome Stabilization

- Blue light **is absorbed** by bacteria's porphyrins
- Porphyrin molecules produce singlet oxygen radicals, **damaging bacteria cell walls**
- Weak bacterial defense against singlet oxygen **enhances photodynamic inactivation**
- **15-minute painless treatment**

Contact us to learn more!

Yellow LM[®] LLLT

Light-Modulation Low-Level Light Therapy

Used for **Drainage**
and **Swelling Reduction**

- **Enhances mitochondrial respiration**, boosting ATP production
- **Stimulates nitric oxide release** for neuro-transmission and tissue repair
- **Reduces inflammation** by **decreasing edema** and enhancing skin elasticity, while also **lowering metalloproteinase activity**
- **15-minute painless treatment**

“ Ideally, a technology employed for disease prophylaxis should be **fast, easy to use, non invasive, painless** and **safe**, without any contraindications or influences on surgery. →

G. GIANNACCARE - MD, PHD, FEBO

SOURCE: Outcomes of Low-Level Light therapy for the Prophylaxis of Iatrogenic Dry Eye After Cataract Surgery: A prospective Randomized Double-Masked Controlled Clinical Trial

All these characteristics are incorporated in LM[®] LLLT (Light-Modulation Low-Level Light Therapy); thus making this technology suitable for improving patients' comfort after surgery.
