HEAR WHAT DR. PAUL KARPECKI SAYS ABOUT EPI-C PLUS:

I consider EPI-C PLUS a “next-generation” light therapy system since it doesn’t require coupling gel to conduct the electrical transmission to the skin. I like the fact that I can treat more skin types with this IPL system and the addition of LLLT enhances the effects via a synergistic light therapy.

But the main reason is the impressive results I’ve witnessed in my patients from EPI-C PLUS which surprisingly also had significant cost savings.
