

Measurements made easy.

A digital measuring application for quick lens centration.

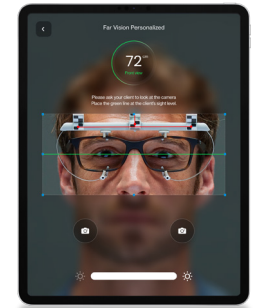

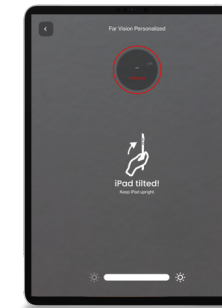

1. Embrace a digital in-store experience

Seamless navigation

Quickly master fitting parameters and enjoy an easy measurement process thanks to its intuitive interface.

By following the on-screen guidance, the digital display provides reliable results for easy reading and analysis.

For your high-tech practice

The Frame Comparison Module allows the patient to compare and choose their favorite frame by taking pictures of their try-ons to facilitate comparison.

eye-ruler™ 2 is a well-rounded digital measuring application.

With its intuitive navigation, eye-ruler™ 2 is designed to take all necessary measurements in less than one minute.

It provides practitioners with a complete solution to expertly deliver personalized lenses and ensure a seamless optical experience for the consumer.

2. Benefit from all necessary measurements

For all far vision measurements

Thanks to 3D reconstruction technology, all standard and personalized measurements* in less than one minute.

Efficient, well-rounded solution

Based on efficient and robust hardware and software elements, eye-ruler™ 2 is a compact and handheld solution.

With dedicated accessories

Measuring clip and its correct positioning on the patient's frame

*Complete list of all parameters available at the end of this brochure.

3. Raise your game with Near Vision Behavior¹

A unique² lens personalization experience

Exclusive³ to Varilux® XR Series™ lenses, the Near Vision Behavior measurement assesses the patient's visual needs and optimizes the shape and position of vision volume.

A 4-in-1 in-store measurement

The natural posture and visual behavior in near vision of the patient is captured by recreating a dynamic reading task of daily life.

Varilux® XR Series™ is a tailor-made design from the combination of four parameters for a smooth and complete adaptation to the new lenses.

¹Only available with Varilux® XR Track, XR 4D and XR Pro depending on local market availability.

²Only available to eye care professionals dispensing Essilor® lens innovations compatible with an Essilor Instruments digital device to do the measurements.

³Exclusivity refers to all those products, measurements and technologies covered by patents owned by Essilor®.
